ZoomTopic 3D slide show is an exciting alternative to PowerPoint.

Built on ROOMS 3D Desktop technology, ZoomTopic lets you hop from place to place in a 3D virtual world.

At each hop you can have sound, text and pictures and can launch other software to play media, or browse, or anything else for your demonstration or presentation.

ZoomTopic can be launched automatically (autorun) from CD or DVD so you can use it with promotional material or as a 3D menu or product installer.

Check out the demo and download the samples.
